

AerWay®

Sportstine®

Effective Aeration - where you need it - when you need it

The Sportstine® is a 6" long, heavy-duty aeration tine for use on golf course fairways, sports fields and all large areas of maintained turf grass.

Use of the Sportstine® is fast, effective and economical. It can even be used mid-season when the need is the greatest and the "window of opportunity" exists.

Advanced Aeration Systems

Sportstine® lets you aerate and play right away

Using the Sportstine® will not take the course or field out of play and there is no clean up required.

Side & end profile - Sportstine®

The Sportstine® is a member of the AerWay® family of products. AerWay® manufactures a range of tines under the names Finetine®, Sportstine® and Shattertine®, each designed for a specific use. Contact AerWay® for information on the product specifically suited for your conditions.
